

# Three Phase 3LVCTM

The 3LVCTM low Voltage CT Multifunctional meter comes in a wide range. There is a choice of CT/PT connected electronic 3 phase 4 wire and 3 phase 3 wire meters, of Cl. 1, Cl. and 0.5. This includes four quadrant meters, multifunction meters, summation meters etc. We can provide meter modifications that include other terminal arrangements, voltages and currents.

The Three Phase meters are fully programmable and very powerful meters that can satisfy your most demanding request. Its reliable performance under heavy load and high harmonic conditions makes it a superb choice as the gate of power station or large power consumer.

## 3DirectM

Three phase four wire, multifunctional TOU meter, with LCD display. This includes:

- Active Cl. 1
- Custom Current and Voltage
- Optional 4 tariff and 8 time sections per day
- RS485 interface & 4 Impulse output

Modifications such as other terminal arrangements, voltages and currents etc. are available. Further details on request
